

- Strong knowledge of serial Communications(Designed and implemented a full feature controller for stepper motor, Digital oscilloscope , Digital Temperature ...)
- Developed User interface for Thin client such as Wyse
- Expert in mySQL
- Developed several application with PHP + mySQL or Perl + mySQL
- Professional in Debian/Suse/Redhat
- Good knowledge of X graphic environment on Unix platform including Xfree86 , Cygwin
- Remote secure server management using SSH1/2 and sub-protocols such as SCP and SFTP
- Auditing network security in order to find vulnerabilities and securing network
- Strong Knowledge of Linux security
- Hands on experience with sun's NIS and NIS+ server and clients with complex and hybrid configurations
- Implemented Hosting for IROST
- Familiar with Jakarta Tomcat
- Experience with file sharing service including SMB , NFS
- Familiar with Network switches from Cisco Systems , Foundry Network
- Good Knowledge of Intel Router
- Good knowledge of SNMP protocol for Network management and monitoring
- Familiar with internet DNS roots servers operations and policies
- Implemented all ISP services and servers on Linux
- Good knowledge of IPRROUTE2,QOS
- Experienced in Network Troubleshooting
- Implemented SMS Service(Short Message Service) for IROST
- Implemented Monitoring system for IROST Data Center(scientific datacenter) contains:
 - Environmental Object(Temperature, Humidity, Voltage, current, phases)
 - Server and services
 - Alarming by SMS/Dial/Web
- Implemented Band width management for LAN
- Expert with installation and configuration of some CMS such as Xoops
- Designed billing software for squid
- Implemented Data Center for National Organization for civil Registration (NOCR.IR) and Power Organization based on TIA 942 standard.
- Virtualization by KVM/Open VZ for Data center and implementing HA

- Trained Linux AND Administration in IROST
- Trained Operating System , Networking, Linux, Data Communication in AMIRKABIR College of Management and Technology (ACMT)
- Designing Appliance(Embedded) for Bandwidth management and network tools

Certificated:

- C# certificated
- SNRS certificated
- Juniper Network
 - Security manager fundamentals (SMF)
 - Attack presentation with juniper network firewall product (APJF)
 - Advanced Juniper network VPN implementations (AJVI)
 - Configuring Juniper network firewall/IPSec VPN product (CJFV)
 - Implementation Intrusion detection and prevention (IIDP)
 - Integrating Juniper network Firewall/IPSec VPNs into High performance network (IFVH)
 - CCNA
 - IELTS (Academic Overall : 6)
